

ABDULLAH SULTAN AL-MALIKI

Az Zubayr, Basra Governorate, Iraq | +964 772 530 6700 | theabdullahsultan@gmail.com

PROFESSIONAL SUMMARY

Fourth-year Electrical Engineering student with a strong foundation in circuit design, control systems analysis, and power systems. Possesses practical industrial experience through training on Computerized Maintenance Management Systems (SAP CMMS) and safety protocols. Combines applied engineering skills with programming capabilities to develop effective solutions in equipment maintenance and system simulations.

EDUCATION

Bachelor of Science in Electrical Engineering

Expected Graduation: 2027

University of Basrah | Basrah, Iraq

- **Key Courses:** Operational Amplifiers, Power System Stability, Synchronous Machines, Signal Processing.
- **Academic Track:** Registered under the Bologna System.

PROFESSIONAL EXPERIENCE

Engineering Trainee

Jul 2026 – Aug 2026

Basrah Gas Company (BGC) | Basrah, Iraq

- Developed field reference guides and presentation materials for industrial safety protocols and preventive measures.
- Structured and managed Computerized Maintenance Management System (CMMS) data utilizing SAP S/4HANA modules.

Founder & Operator

May 2026 – Present

Mobile Device Repair Workshop | Basrah, Iraq

- Designed and planned the electrical distribution board for the workshop to ensure efficient and safe operation.
- Executed electrical wiring and selected/distributed main and branch circuit breakers for specialized equipment and devices.

ENGINEERING & SOFTWARE PROJECTS

- **4-bit Digital-to-Analog Converter (DAC):** Designed and simulated a DAC circuit using Operational Amplifiers in Multisim, preparing academic reports and detailed schematic diagrams.

- **Active Band-Stop Filter:** Designed and analyzed the frequency response for an active notch filter intended to reject a 19 kHz pilot tone.
- **Python Automation & Simulation:** Developed scripts for electrical circuit simulations, created a Telegram video downloader bot, and programmed 2D motion and collision physics using the Pygame library.

SKILLS

- **Engineering Software & Tools:** MATLAB, Simulink, NI Multisim, SAP S/4HANA.
- **Programming Languages:** Python.
- **Technical Skills:** Control circuit design and analysis, signal processing systems, electrical distribution board wiring and planning.
- **Additional Skills:** Audio processing and frequency optimization (Vegas Pro).

LANGUAGES

- **Arabic:** Native
- **English:** Advanced (Second Language)
